Searching for a Leak

Early Sunday, January 7th, 2024 a Foresthill Public Utility operator noticed an extremely high demand at the treatment plant. We mobilized the crew early that morning in snowy and icy weather conditions to begin searching. After checking all of our major pressure reducing stations with no indications of high flows one of our operators located the leak behind Foresthill High School. He found that an air release valve had been hit by a vehicle driving in the snow the previous night. The geyser was shooting approximately 60 ft in the air which was higher than the nearby trees and visible from Dollar General. Foresthill quickly put a temporary fix on the leak then came back on the following workday to wrap up the repair. We coordinated with Foresthill High School staff to make them aware of the situation and clear the easement to access the leak.

Next Foresthill Meeting

Foresthill Elementary School
Thursday,
February 8th, 2024
at 6:00 P.M

Check your Foresthill website for an agenda which will be posted 72 hours before the meeting.
