INDEPENDENT AUDITOR'S REPORT

To the Board of Directors
Foresthill Public Utility District
Foresthill, California

Opinion

We have audited the accompanying financial statements of the governmental activities and business-type activities of Foresthill Public Utility District (District) as of and for the year-ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the Table of Contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities and business-type activities of the District as of June 30, 2022, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the District, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

To the Board of Directors
Foresthill Public Utility District
Foresthill, California

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

To the Board of Directors
Foresthill Public Utility District
Foresthill, California

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis information, the schedule of the District's proportionate share of the net pension liability, and the schedule of contributions, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted principally of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurances on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide an assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The budget to actual-enterprise fund, schedule of operating expense-enterprise fund and debt covenant ratios are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied to the basic financial statements and, accordingly, we express no opinion or provide any assurance on it.

FORESTHILL PUBLIC UTILITY DISTRICT

Management's Discussion and Analysis For the Fiscal Year Ended June 30, 2022

This section of the Foresthill Public Utility District (District) annual financial report presents a narrative overview and analysis of the District's financial activities for the fiscal year ended June 30, 2022. We encourage readers to consider the information presented here in conjunction with the transmittal letter in the Introductory Section and with the basic financial statements and related notes, which follow this section.

FINANCIAL HIGHLIGHTS

- The District's Government-wide Net Position increased 8.64% or \$1,056,529 to \$13,290,138 in fiscal year 2022.
- In 2022, the District's Enterprise Fund's total operating revenues decreased 3.56% or \$101,337 after adjusting for the prior year water transfer of \$675,000.
- In 2022, the District's operating expenses decreased by 26.19% or \$666,277 under the prior year. This was caused by a large actuarial adjustment in unfunded pension liability of \$516,181. Excluding pension and OPEB, costs decreased by 6.13% or \$150,096.

OVERVIEW OF THE FINANCIAL STATEMENTS

The financial section of this report consists of the following parts:

- Independent Auditor's Report;
- Management's Discussion and Analysis (this section);
- Basic Financial Statements:
 - Government-Wide Financial Statements;
 - Fund Financial Statements; and
 - Notes to Financial Statements
- Required Supplementary Information
- Supplemental Information

The basic financial statements include two kinds of statements that present different views of the District.

GOVERNMENT-WIDE FINANCIAL STATEMENTS:

The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business.

The Statement of Net Position (page 12) presents information on all of the District's assets and liabilities, with the difference between the two reported as "net position." Over time, increases or decreases in net position may serve as a useful indicator of the District's financial improvement or deterioration.

The Statement of Activities (page 13) presents information showing how the government's net position changed during the past year. All changes in net position are reported as soon as the underlying event

FORESTHILL PUBLIC UTILITY DISTRICT

Management's Discussion and Analysis For the Fiscal Year Ended June 30, 2022

giving rise to the change occurs, regardless of the timing of related cash flows (accrual basis of accounting). Thus, revenues and expenses are reported in this statement for some items that will result in cash flows in future fiscal periods (e.g., earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the District that are principally supported by taxes and intergovernmental revenue – “governmental activities” from other functions that are intended to recover all or a significant portion of their costs through users fees and charges – “business-type activities.” The governmental activities of the Foresthill Public Utility District includes debt service for the improvement bonds. The business-type activity of the District's is the water system.

FUND FINANCIAL STATEMENTS

A “fund” is a group of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Foresthill Public Utility District can be divided into two categories:

- Governmental Funds; and
- Proprietary Funds

Governmental funds are used to account for essentially the same functions reported as “governmental activities” in the government-wide financial statements. However, unlike those statements, the focus in these statements is on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. This information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The District has only one governmental fund: Assessment District No. 2 Debt Service Fund. Proprietary funds are generally used to account for services for which the District charges customers. Proprietary funds provide the same type of information as shown in the government-wide financial statements, only in more detail. The District maintains one type of proprietary fund, an enterprise fund, as described below.

Enterprise funds are used to report the same functions as presented as business-type activities in the government-wide financial statements. The District uses an enterprise fund to account for water operations.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

ANALYSIS OF NET POSITION

With the consolidation of government-wide net position into one statement and other changes such as the exclusion of fiduciary funds, net position may now serve as a useful indicator of a government's financial position. For the District, assets and deferred outflows exceeded liabilities and deferred inflows of resources by \$13.29 million.

The Summary of Net Position is as follows as of June 30, 2022 and 2021:

FORESTHILL PUBLIC UTILITY DISTRICT

Management's Discussion and Analysis For the Fiscal Year Ended June 30, 2022

Governmental Activities changed the District's net position by \$25,492. Business-type Activities changed the District's net position as follows:

Decrease in capital assets, net of related debt	\$ 126,502
Increase in reserve for capital activities	(115,261)
Increase in reserve for repairs and replacements	(1,922)
Increase in reserve for debt services	(132,689)
Increase in unrestricted reserves	1,209,406
Change in net position	<u>\$ 1,086,036</u>

Such increases in net position are vital to the District as capital projects must be "saved up" for. During the fiscal year, the District began a pipeline replacement project will ultimately cost \$2,196,000. Additional projects are planned and will be completed as the necessary reserves are accumulated.

REVENUES

The Governmental Activities total revenues and transfers were \$83,444 and Business-Type Activity revenues were \$2,850,687 for the year ended June 30, 2022. This represented a total decrease of \$904,673 from 2021. Program revenues include charges for services and grants and contributions. Program revenues provided approximately \$2,742,562 for business-type activities. General revenues include, among other things, taxes, assessments, and intergovernmental revenues. General revenues provided \$191,569. The majority of general revenues came from property taxes, assessments, capital facility fees, offset by investment losses.

EXPENSES

Expenses for the District totaled \$1,822,603 for the fiscal year ended June 30, 2022. Governmental activities incurred \$57,952 in expenses and business-type activities incurred \$1,764,651 in expenses during the year. Business-type activity expenses were funded by program revenues.

FINANCIAL ANALYSIS OF THE DISTRICT'S FUNDS

The Foresthill Public Utility District uses fund accounting to segregate accounts for specific activities or objectives, including demonstrating finance-related legal compliance.

GOVERNMENTAL FUNDS

The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of resources that are available to provide services and capital project construction. In particular, unreserved fund balance may serve as a useful measure of a government's net spendable resources.

At the end of Fiscal year 2021-22, the District's governmental fund reported committed fund balance of \$16,547 for debt service.

CAPITAL ASSET AND DEBT ADMINISTRATION

CAPITAL ASSETS

The capital assets are reported as follows:

Capital assets, not being depreciated	
Land	\$ 36,568
Construction in progress	161,352
Intangible assets, net	1,089,619
Total assets not being depreciated	<u>1,287,539</u>
Depreciable capital assets	
Assets at cost:	
Source of supply	3,016,487
Pumping plant	31,286
Water treatment	1,532,142
Transmission and distribution	11,289,923
General plant	498,023
Total assets at cost	<u>16,367,861</u>
Less accumulated depreciation	<u>(8,207,127)</u>
Capital Assets, Net	<u>\$ 9,448,273</u>

The District's investment in capital assets, before the related debt, for its governmental and business-type activities as of June 30, 2022, was \$9,448,273 (net of accumulated depreciation). This investment in capital assets includes: land, buildings, improvements other than buildings, and equipment. The District's investment in capital assets, before the related debt, had a net decrease in FY 2021-22 of \$7,326. For government-wide financial statement presentation, all depreciable capital assets are depreciated from the acquisition date over their useful lives on a straight-line basis.

DEBT ADMINISTRATION

At the end of FY 2021-22, the District had long-term liabilities of \$1,629,500 and \$812,179 for governmental activities and business-type activities, respectively. Additional information about the District's long-term obligations can be found in Notes 5 and 6 in the Notes to the Basic Financial Statements.

GOING FORWARD

Government Activities:

Assessment District No. 2 Debt Service Fund:

2017 Water Revenue bonds	\$ 738,500
2017 Limited Obligation Refunding bonds	1,005,300
Total Assessment District	<u>1,743,800</u>

Business-Type Activities:

District Enterprise Fund:

2014 Water loan agreement	952,755
Total Enterprise Fund	<u>952,755</u>

Total Long-Term Debt \$ 2,696,555

The District had no water transfers during 2021/2022. The water transfer market is difficult to predict and it is unknown if future transfers will be available. The District will investigate future transfers and use the proceeds to fund investments in the public water system. Work continues on an extension of the community's water right permit. Environmental documentation for the permit extension should be complete in 2023.

Construction of dedicated sample stations began in 2021/22. The stations are used to test the adequacy of the disinfection process. Improving sample stations will be an on-going project.

The District began the Sierra View project to replace over 6,000 linear feet of pipeline. This project will also replace and modernize the firefighting equipment in that area to improve the safety of the community. The final phase of this project, resurfacing the affected roads, will be completed in spring 2023.

REQUESTS FOR INFORMATION

This financial report is designed to provide the District's funding sources, customers, stakeholders, and other interested parties with an overview of the District's financial operations and financial condition. FORESTHILL PUBLIC UTILITY DISTRICT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2022

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The basic financial statements of Foresthill Public Utility District (the “District”) have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard setting body of establishing governmental accounting and financial reporting principles. As allowed by the GASB, the District has elected to apply to its proprietary activities Financial Accounting Standards Board Statements and Interpretations, Accounting principles Board Opinions, and Accounting Research Bulletins of the Committee of Accounting Procedures issued after November 30, 1989 where not in conflict with GASB pronouncements. The more significant of the District’s accounting policies are described below.

A. The Reporting Entity

The Foresthill Public Utility District (the District) was formed in 1950 and operates under The Public Utility District Act (The Act). The Act confers upon the District the rights and powers to fix rates and charges for commodities or services furnished, to incur indebtedness and issue bonds or other obligations, and, under certain circumstances, to levy and collect ad valorem property taxes. The District is governed by a five-member Board of Directors elected by the voters within the District.

B. Basis of Presentation

Basis of Presentation – Government-wide Financial Statements: The government-wide financial statements (i.e. the statement of net position and statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges to external parties.

Separate financial statements are provided for the Assessment District No. 2 Debt Service governmental fund and District Enterprise proprietary fund.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Certain indirect costs are included in the program expenses of most business-type activities. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

FORESTHILL PUBLIC UTILITY DISTRICT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2022

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Basis of Presentation (continued)

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund financial statements. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred. Grant revenue is recognized when program expenditures are incurred in accordance with program guidelines. When such funds are received they are recorded as deferred revenues until earned. Earned but unbilled water services are accrued as revenue.

Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenues when all eligibility requirements are met.

Basis of Presentation-Fund Financial Statements: The accounts of the District are organized on the basis of funds. A fund is a separate self-balancing set of accounts. Each fund was established for the purpose of accounting for specific activities in accordance with applicable regulations, restrictions, or limitations. Separate financial statements are provided for governmental funds and proprietary funds.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. For this purpose, the District considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures are generally recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, and claims and judgments, are recorded only when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds.

Property taxes and interest associated with the current fiscal period are all considered to be susceptible to accrual and have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The District reports the following governmental fund:

Assessment District No. 2 Debt Service Fund – To account for revenues and expenditures associated with the Assessment District No. 2 bonds.

FORESTHILL PUBLIC UTILITY DISTRICT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2022

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Basis of Presentation (continued)

The District reports the following enterprise fund:

District Enterprise Fund – The District Enterprise Fund is used to account for all revenues and expenses for operation maintenance and capital improvement funding of the Foresthill Public Utility District facilities.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the District's enterprise funds are charges to customers for sales and services. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

C. Property Taxes

The District receives property taxes from Placer County. Property taxes receivable are recorded in the fiscal year for which the tax is levied based on the property's assessed value. They become a lien on the first day of the year they are levied. Secured property tax is levied on July 1 and due in two installments, on November 1 and March 1. They become delinquent on December 10 and April 10, respectively. Unsecured property taxes are due on July 1, and become delinquent on August 31. The District elected to receive the property taxes from the County under the Teeter Bill Program. Under this program, the District receives 100% of the levied property taxes in periodic payments, with the County assuming responsibility for delinquencies.

D. Inventories

Inventories have been valued at the lower of cost (first-in, first-out) or market. Inventories consist of materials and supplies.

E. Cash and Cash Equivalents

For purposes of the statement of cash flows, the District considers all highly liquid debt investments purchased with a maturity of three months or less to be cash equivalents, including restricted assets, along with all pooled deposits and investments in the Local Agency Investment Fund, which are available upon demand.

F. Investments

Investments, including LAIF, are stated at fair value, which represents the quoted or stated market value. Investments that are not traded on a market, such as investments

FORESTHILL PUBLIC UTILITY DISTRICT

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

F. Investments (continued)

in external pools, are valued based on stated fair value as represented by the external pool. Investments are within the State statutes and the District's investment policy.

G. Receivables and Payables

Property and utility user taxes related to the current fiscal year are accrued as revenue and accounts receivable and are considered available if received within 60 days of year end. Federal and state grants are considered receivable and accrued as revenue when reimbursable costs are incurred under the accrual basis of accounting in the government-wide statement of Net Position. The amount recognized as revenue under the modified accrual basis is limited to the amount that is deemed measurable and collectible.

Activity between funds that is representative of lending/borrowing arrangements outstanding at the end of the fiscal year is referred to as either "due to/from other funds" (i.e., the current portion of interfund loans). Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

The District estimates the amount of uncollectible receivables based on prior experience and history. There was no allowance for doubtful accounts as of June 30, 2022.

H. Capital Assets

Capital assets, which include land, ponds, buildings and improvements, machinery and equipment, and vehicles are reported in the applicable business-type activities column in the government-wide financial statements. Capital assets are defined by the government as assets with an initial, individual cost of more than \$2,500 and an estimated useful life in excess of one year. Such assets are recorded at historical cost if purchased or constructed. Donated capital assets are recorded at the estimated fair market value at the date of donation. For certain assets, estimated historical costs are used.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

FORESTHILL PUBLIC UTILITY DISTRICT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2022

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

H. Capital Assets (continued)

Depreciation is calculated by the straight-line method over the estimated useful lives of the respective assets that range from five to forty years.

It is the District's policy to capitalize all land and equipment with a cost of \$2,500 or more. Costs of assets sold or retired (and related amounts of accumulated depreciation) are eliminated from the accounts in the year of sale or retirement and the resulting gain or loss is included in the operating statement of the related fund. In governmental funds, the sale of general capital assets is included in the statement of revenues, expenditures, and changes in fund balances as proceeds from sale.

I. Compensated Absences

Vested or accumulated vacation leave and compensation time that is expected to be liquidated with expendable available resources is reported as a current liability. Accumulated sick leave is vested upon age sixty.

J. Budget and Budgetary Accounting

The Board of Directors annually adopts an operating budget. The operating budgets are prepared on the accrual basis to match the operating statements.

K. Restricted Assets

Certain proceeds of the District's long-term debt are classified as restricted assets on the balance sheet because their use is limited by applicable bond covenants. The "reserve" account is used to report resources set aside to make up potential future deficiencies in the bond's debt service.

L. Deferred and Unearned Revenues

Deferred revenues in governmental funds arise when a potential revenue does not meet both the "measurable" and "available" criteria for recognition in the current period. Unearned revenues arise when resources are received by the District before it has legal claim to them (i.e., when grant monies are received prior to the incurrence of qualifying expenditures).

M. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

FORESTHILL PUBLIC UTILITY DISTRICT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2022

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

N. Long-term Obligations

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-activities, or proprietary fund type statement of Net Position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method. Bonds payable are reported net of the applicable bond premium or discount. Issuance costs are reported as deferred charges and are amortized over the life of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, even if withheld from the actual net proceeds received, are reported as debt service expenditures.

O. Net Position

The government-wide financial statements utilize a Net Position presentation. Net Position are categorized as invested capital assets (net of related debt), restricted and unrestricted.

Invested in Capital Assets, Net of Related Debt — This category groups all capital assets into one component of Net Position. Accumulated depreciation and the outstanding balances of debt that are attributable to the acquisition, construction, or improvement of these assets reduce the balance in this category.

Restricted Net Position — This category presents external restrictions imposed by creditors, grantors, contributors, laws, or regulations of other governments, and restrictions imposed by law through constitutional provisions or enabling legislation. As of June 30, 2022, the Restricted Net Position consisted of the following:

<u>Fund Type</u>	<u>Amount</u>	<u>Action</u>
District Enterprise Fund:		
Capital reserve	\$ 125,322	Imposed by board designation
Repairs and replacement reserve	1,647,696	Imposed by board designation
Debt service reserve	<u>161,460</u>	Imposed by board designation
Total Restricted	<u>\$ 1,934,478</u>	

FORESTHILL PUBLIC UTILITY DISTRICT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2022

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

O. Net Position (continued)

Unrestricted Net Position — This category represents Net Position of the District not restricted for any project or other purpose.

In the government-wide financial statements, when both restricted and unrestricted resources are available for use, it is the government’s policy to use restricted resources first, then unrestricted resources as they are needed.

P. Fund Equity

In accordance with Government Accounting Standards Board (GASB) No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, the District classifies its governmental fund balance as follows:

- Committed – includes fund balance amounts that are constrained for specific purposes that are internally imposed by the government through formal action of the highest level of decision-making authority and does not lapse at year-end.

The committed fund balance is comprised of the following:

Fund Type	Amount	Action
Assessment District No. 2		
Debt Service Fund:		
Committed for debt service	\$ 16,547	Imposed by loan agreement

The District uses restricted or committed amounts to be spent first when both restricted and unrestricted fund balance is available unless there are legal documents or contracts that prohibit doing this, such as a grant agreement requiring dollar for dollar spending. Additionally, the District would first use committed, then assigned, and lastly unassigned amounts of unrestricted fund balance when expenditures are made.

The District does not have a formal minimum fund balance policy.

Q. New Accounting Pronouncements

The District adopted the provisions of GASB Statement No. 87 (GASB 87), *Leases*. No significant impact as a result of adoption.

FORESTHILL PUBLIC UTILITY DISTRICT

For the Fiscal Year Ended June 30, 2022

NOTE 2 – CASH AND INVESTMENTS

Investments

California statutes authorizes the District to invest in a variety of credit instruments as provided for in the California Government Code Section 53600, Chapter 4 – Financial Affairs. The Government Code allows investments in obligations of the U.S. Treasury, agencies, and instrumentalities, commercial paper rated A-1 by Standard & Poor’s or P-1 by Moody’s, bankers’ acceptance, repurchase agreements, medium-term corporate notes, mutual funds, and the State Treasurer’s Local Agency Investment Fund (LAIF).

Cash and investments at June 30, 2022 are classified in the accompanying financial statements as follows:

Concentration of Credit Risk

The investment policy of the District limits the amount that can be invested in any one issuer to the lesser of the amount stipulated by the California Government Code or 50% of total investments, with the exception of U.S. Treasury obligations, U.S. Agency Securities, and LAIF. As of June 30, 2022, the District had no individual investment that exceeded 5% of its total investments.

Custodial Credit Risk

Custodial credit risk is the risk that, in the event of the failure of a depository financial institution or for amounts held with fiscal agents, the District will not be able to recover its deposits or will not be able to recover collateral securities that are in possession of an outside party such as a broker-dealer. The California Government Code and the District’s investment policy do not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits, other than the following provision for deposits: The California Government Code requires that a financial institution secure deposits made by state or local governmental units by pledging securities in an undivided collateral pool held by a depository regulated under state law (unless so waived by the governmental unit). The market value of the pledged securities in the collateral pool must equal at least 110% of the local amount deposited by the public agencies. California law also allows financial institutions to secure public agency deposits by pledging first trust deed mortgage notes having a value of 150% of the secured public deposits.

Custodial Credit Risk (continued)

At June 30, 2022, the carrying amount of the District’s deposits was \$642,378 and the balances in financial institutions were \$1,467,794. Of the balance in financial institutions, up to \$250,000 was covered by federal depository insurance. The cash pooled with the county totaled \$16,501.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates.

Information about the sensitivity of the fair values of the District’s investments (including investments held by bond trustee) to market interest rate fluctuations is provided by the following table that shows the distribution of the District’s investments by maturity:

Investments by Fair Value Level

In accordance with GASB Statement No. 72, the District’s investments in its brokerage account are categorized into the following fair value categories:

Level 1 inputs – quoted prices (unadjusted) in active markets for identical assets or liabilities that the District can access at the year end.

Level 2 inputs – Inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly or indirectly.

Level 3 inputs – Unobservable inputs for an asset or liability.

Investment in LAIF

The District maintains an investment in the State of California Local Agency Investment Fund (LAIF), managed by the State Treasurer. This fund is not registered with the Securities and Exchange Commission as an investment company, but is required to invest according to California Government Code. Participants in the pool include voluntary and involuntary participants, such as special districts and school districts for which there are legal provisions regarding their investments. The Local Investment Advisory Board (Board) has oversight responsibility for LAIF. The Board consists of five members as designated by State Statute. LAIF is stated at amortized cost, which approximates fair value. The LAIF is a special fund of the California State Treasury through which local governments may pool investments. The total fair value amount at June 30, 2022 invested by all public agencies in LAIF is \$236 billion managed by the State Treasurer. The investments are as follows:

Structured notes and medium-term asset backed securities	As a Percent of Portfolio
Short-term asset-backed commercial paper	26.51%
All other investments	4.91%

The fair value of the District’s investment in this pool is reported in the accompanying financial statements at amounts based upon the District’s pro-rata share of the fair value provided by LAIF for the entire LAIF portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by LAIF, which are recorded on an amortized cost basis.

NOTE 6 – DEFINED BENEFIT PENSION PLAN

CalPERS Miscellaneous Pension Plan

Miscellaneous, Cost-Sharing Multiple-Employer Defined Benefit Pension Plans

Plan Description

The District's Miscellaneous plan became part of CalPERS Miscellaneous Risk Pools for employers with less than 100 active plan members. When these risk pools were established, CalPERS assigned each entity in the pool a share of the net pension liability. The Miscellaneous employees are part of a three-tier cost-sharing multiple-employer defined benefit plan administered by CalPERS. The second-tier retirement program provides a lower level of retirement benefits than the first tier. Employees hired on or after January 1, 1982 who meet eligibility requirements, are enrolled in the second-tier program.

The third-tier program was implemented in January 2013 following the passage of AB340 (PEPRA) by the California Legislature. Employees hired on or after January 1, 2013, who were not previously enrolled in the PERS system elsewhere or who have had a break in service of at least 6 months are required to be enrolled in this retirement program which provides a benefit level that is lower than the first two tiers.

Benefits Provided

CalPERS provides service retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members who must be public employees and beneficiaries. Benefits are based on years of credited service, equal to one year of full-time employment. Members with five years of total service are eligible to retire at age 50 with statutorily reduced benefits. All members are eligible for non-duty disability benefits after 10 years of service. The death benefit is one of the following: The basic death benefit, the 1957 Survivor Benefit, or the Optional Settlement 2W Death Benefit. The Cost of living adjustments for each plan are applied as specified by the Public Employees' Retirement Law. Benefit provisions and all other requirements are established by State statute and may be amended by District contracts with employee bargaining groups.

Contributions

Section 20814(c) of the California Public Employees' Retirement Law (PERL) requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through the CalPERS' annual actuarial valuation process. For public agency cost-sharing plans covered by either the Miscellaneous or Safety risk pools, the Plan's actuarially determined rate is based on the estimated amount necessary to pay the Plan's allocated share of the risk pool's costs of benefits earned by employees during the year, and any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees.

NOTE 6 – DEFINED BENEFIT PENSION PLAN (CONTINUED)

CalPERS Miscellaneous Pension Plan (continued)

The District pays the tier 1 Miscellaneous plan participant’s 8% contribution of their annual covered salary. Miscellaneous tier 3 plan participants are required to contribute 6.75% of their annual covered salary. In addition, the District is required to make an employer contribution at an actuarial determined rate of 14.53% (tier 1) and 7.47% (tier 3) of annual covered payroll for the year ended June 30, 2022. For the year ended June 30, 2022, contributions to the Plan were \$141,831; \$90,345 employer contributions and \$51,486 employee contributions.

Pension Liabilities, Pension Expenses, and Deferred Outflows/Inflows of Resources Related to Pensions

As of June 30, 2022, the District reported asset of \$83,028 for its proportionate share of the Plan’s net pension liability.

The District’s net pension liability is measured as the proportionate share of net pension liability. The net pension liability is measured as of June 30, 2022, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2021, rolled forward to June 30, 2022. The District’s proportion of the net pension liability based on a projection of the District’s long-term share of contributions to the pension plans relative to the projected contributions of all participating employers, actuarially determined. As of June 30, 2021, the District’s proportion was 0.000196 percent of the Miscellaneous risk pool.

For the year ended June 30, 2022, the District recognized pension expense of (\$294,564). At June 30, 2022, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

NOTE 6 – DEFINED BENEFIT PENSION PLAN (CONTINUED)

Actuarial Assumptions - continued

The underlying mortality assumptions and all other actuarial assumptions used in the June 30, 2020 valuation were based on results of an actuarial experience study for the period from 1997 to 2015, including updates to salary increases, mortality, and retirement rates. The Experience Study Report may be accessed on the CalPERS website at www.calpers.ca.gov. The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, staff took into account both short-term and long-term market return expectations as well as the expected pension fund cash flows. Such cash flows were developed assuming that both members and employers will make their required contributions on time and as scheduled in all future years. Using historical returns of all the funds' asset classes, expected compound (geometric) returns were calculated over the short-term (first 10 years) and the long-term (11-60 years) using a building-block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equivalent to the single equivalent rate calculated above and rounded down to the nearest one quarter of one percent.

The table on the next page reflects long-term expected real rate of return by asset class. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation.

NOTE 6 – DEFINED BENEFIT PENSION PLAN (CONTINUED)

Discount Rate

The discount rate used to measure the total pension liability was 7.15 percent. To determine whether the municipal bond rate should be used in the calculation of a discount rate for each plan, CalPERS stress tested plans that would most likely result in a discount rate that would be different from the actuarially assumed discount rate. Based on the testing, none of the tested plans run out of assets.

Therefore, the current 7.15 percent discount rate is adequate and the use of the municipal bond rate calculation is not necessary. The long-term expected discount rate of 7.15 percent is applied to all plans in the Public Employees Retirement Fund. The stress test results are presented in a detailed report called “GASB Crossover Testing Report” that can be obtained at CalPERS’ website under the GASB 68 section.

Sensitivity of the Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents the District’s proportionate share of the net pension liability for the Miscellaneous plan, calculated using the discount rate of 7.15 percent, as well as what the District’s proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage point lower or 1-percentage point higher than the current rate:

	Discount Rate		
	1% Decrease	Discount Rate	1% Increase
	6.15%	7.15%	8.15%
Plan's net pension liability (asset)	\$ 373,518	\$ (83,027)	\$ (460,447)

NOTE 7 – SECTION 457 PLAN

NOTE 8 – OTHER POST-EMPLOYMENT BENEFITS (OPEB) – (CONTINUED)

Under the current health plan, the District pays for coverage of the retiree and their eligible dependents. To be eligible, employees must retire with the District at age 60 or older or must be permanently disabled.

The District has fewer than 100 plan members and has elected to use the alternative measurement method. The Assumptions and methods used are based on past history and experience.

Net OPEB liability

The District’s net OPEB liability was measured as of June 30, 2022 and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of July 1, 2021. Standard actuarial update procedures were used to project/discount from valuation to measurement dates.

Actuarial assumptions

The total OPEB liability was determined using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified:

Salary increases	2.00 %
Healthcare cost trend rate	4.2% to 4.7% for the next 10 years
Discount rate	5.884%

GASB 75 requires a discount rate that reflects the following:

- a) The long-term expected rate of return on OPEB plan investments – to the extent that the OPEB plan’s fiduciary net position (if any) is projected to be sufficient to make projected benefit payments and assets are expected to be invested using a strategy to achieve that return;
- b) A yield or index rate for 20-year, tax-exempt general obligation municipal bonds with an average rating of AA/Aa or higher – to the extent that the conditions in (a) are not met.

To determine a resulting single (blended) rate, the amount of the plan’s projected fiduciary net position (if any) and the amount of projected benefit payments is compared in each period of projected benefit payments. The discount rate used to measure the District’s Total OPEB liability is based on these requirements.

NOTE 8 – OTHER POST-EMPLOYMENT BENEFITS (OPEB) (CONTINUED)

Sensitivity of the District’s Net OPEB Liability to Changes in the Discount Rate

The following presents the net OPEB liability, as well as what the net OPEB liability would be if it were calculated using a discount rate that is 1- percentage point lower (4.88 percent) or 1-percentage-point higher (6.88 percent) than the current discount rate:

	1% Decrease 4.88%	Discount Rate 5.88%	1% Increase 6.88%
District's net OPEB liability	\$ 130,824	\$ 93,638	\$ 62,046

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend.

Sensitivity of the District’s Net OPEB Liability to Changes in the Healthcare Cost Trend Rates

The following presents the net OPEB liability, as well as what the net OPEB liability would be if it were calculated using healthcare cost trend rates that are 1-percentage-point lower or 1- percentage-point higher than the current healthcare cost trend rates:

	1% Decrease	Trend Rate Current rate	1% Increase
District's net OPEB liability	\$ 77,321	\$ 93,638	\$ 110,671
